Between Jun and Oct (full months): **posts** from 3 to 20 ▲, **total engagement** from 163 to 3,617 ▲, **eng. per post** from 54.3 to 180.8 ▲, **engagement rate** from 0.14% to 0.46% ▲.

About these metrics · KPIs and charts are calculated on **regular posts** only. Outliers (engagement far above the rest: more than the third quartile + 3 times the interquartile range, usually paid media or an isolated viral) are excluded so they don't distort trends, and are listed separately under Posts. Engagement = likes + comments. Engagement rate = average engagement per post ÷ followers.
